

LAPP CONTINUES TO SUPPORT SHELTON STATE COMMUNITY COLLEGE

Lapp Center for Excellence in Cable Technology at Shelton State Community College in Tuscaloosa, Alabama expands to provide hands-on education to an increasing number of students.

Six years ago, LAPP established the Lapp Center for Excellence in Cable Technology at Shelton State Community College in Tuscaloosa, Alabama. The center teaches students the technical aspects of electrical cabling – including selection, installation and code compliance in industrial environments.

Students also gain hands-on experience creating solutions to meet real life application needs. LAPP USA provides the college with state-of-the-art equipment, cables and connectors, and manuals, textbooks, and other written material. Students learn to navigate real world issues of effectiveness and compliance.

Instructor Doug Hall states, “The center has added another layer to our instructional capabilities while enriching the overall curriculum at the same time.”
