LAPP GROUP

CONTINUOUS FLEX

Global leader and innovator in continuous flex cable technology

OLFLEX® FD

OLFLEX® 890 FD

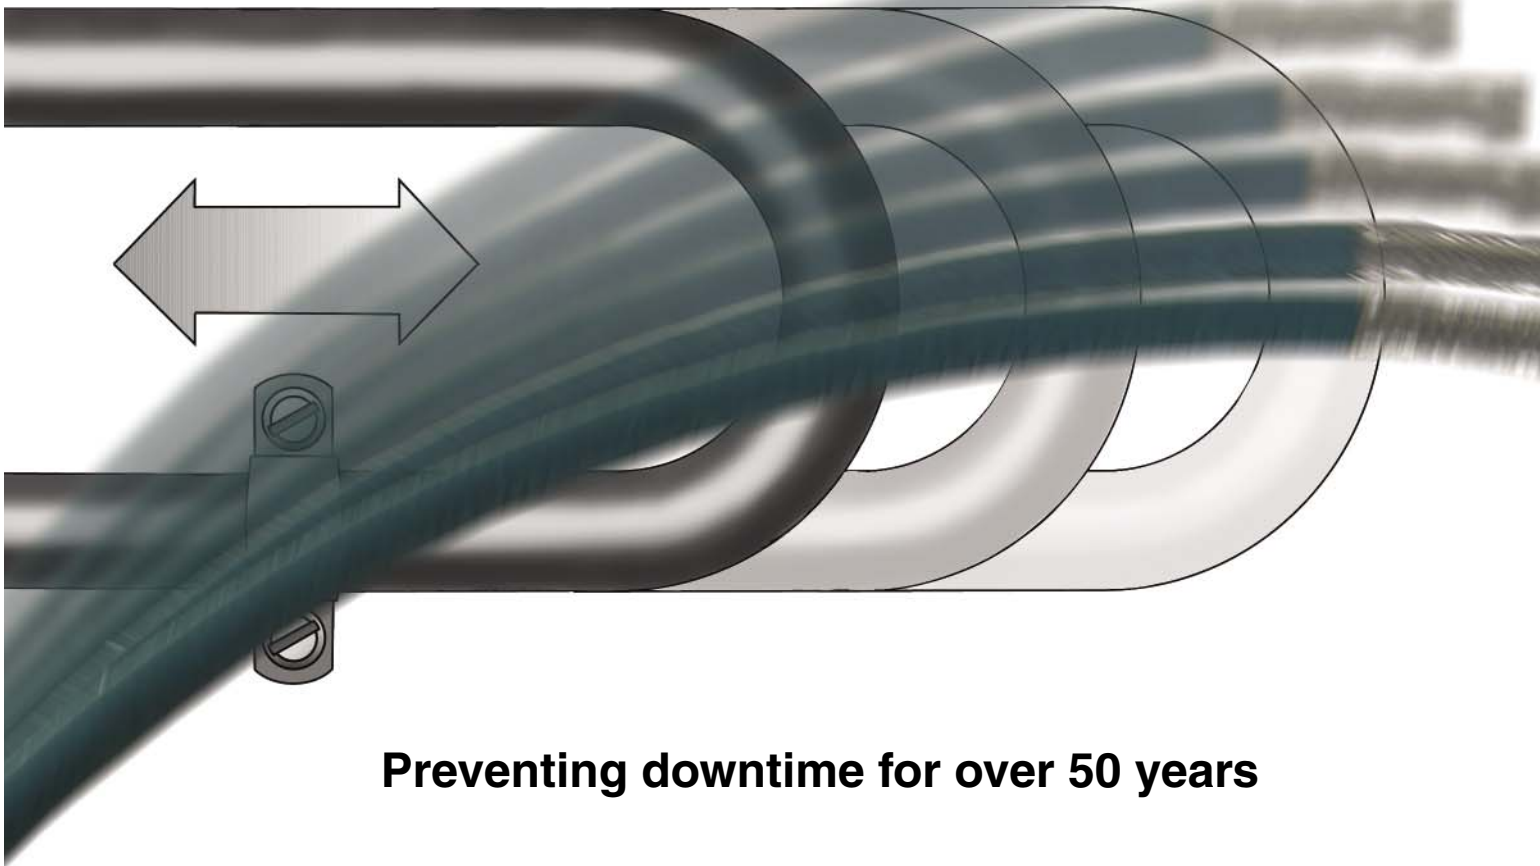

- Extreme oil resistance
- Ultimate flex life.

OLFLEX® Auto X

- Advanced abrasion resistance & flex life
- Tray rated

UNITRONIC® FD

- ETHERLINE® Ethernet cables
- DeviceNet™
- Profibus
- 300V cables
- Advanced environmental, oil & chemical resistance.
- Maximum return on investment

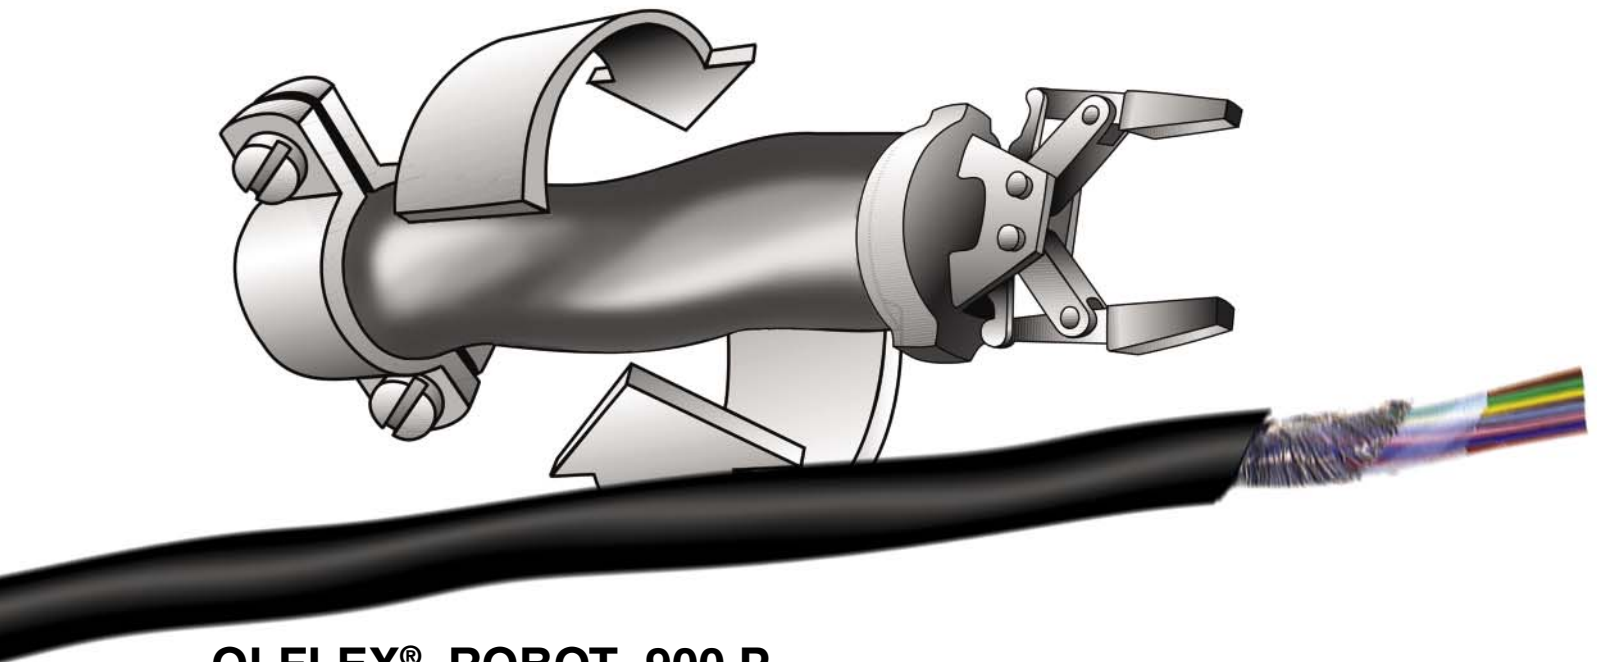

Preventing downtime for over 50 years

TORSIONAL FLEX

ETHERLINE® TORSION

- PUR jacket
- Halogen free.
- Double shielded to eliminate EMI.
- Advanced torsional mechanical resistance:
 - Tested to exceed 1 million bending cycles at a torsional load of 180° per meter length.
- “State of the Art” oil and abrasion resistance.

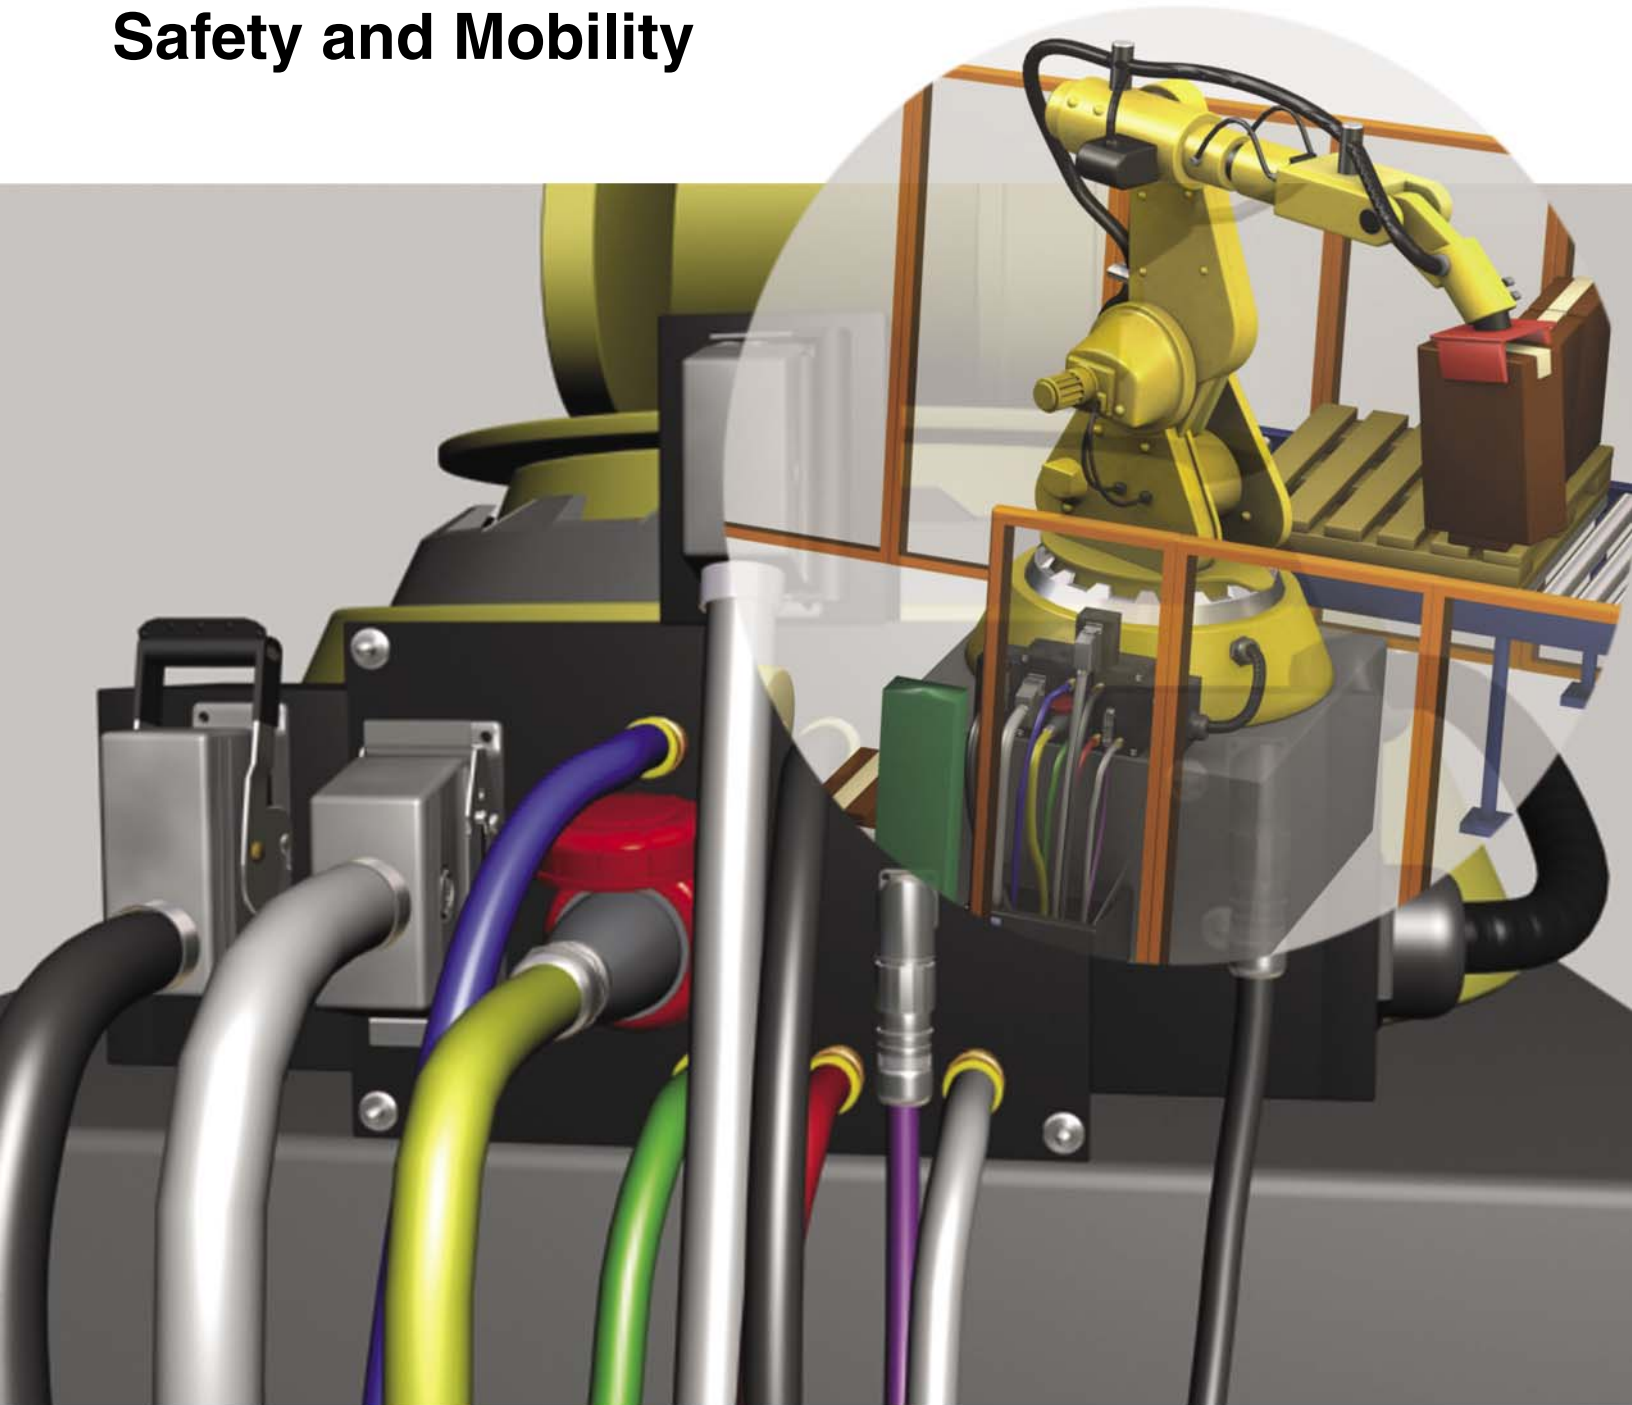

OLFLEX® ROBOT 900 P

- Confidently handles rugged continuous twisting motion applications.
 - Tested to exceed 10 million cycles at a 360 degree bend radius
- Polyurethane jacket:
 - Resists abrasion, oil, notching, microbes and hydrolysis.
- Prevents adhesion to adjacently installed cables.

EPIC[®] CONNECTORS

Simple, Secure, Dependable & Durable
Safety and Mobility

Rectangular • Pin & Sleeve • Circular

Valuable connector solutions for a host of applications

LAPP GROUP

OLFLEX[®] TRAY II

UL TC-ER approved for exposed run in tray without conduit (CSA TC FT4)

Save thousands off plant floor wiring installation and maintenance costs.

Low Total Cost of Ownership:

- Eliminate conduit materials
- Eliminate additional labor costs

Lean Engineering, flexibility in design:

- With no conduit required equipment can be added, moved, or removed easily.

Easy to handle & install:

- Numbered conductors
- Easy to strip
- Perfectly Round

Call today to find out how we can save you money!

LAPP GROUP

Custom-made POPULATED CABLE TRACK

Design & Build Solutions

- Long life and reliability.
- Fast delivery times.
- Custom tailored to your needs.
- Problem application solutions.
