

LAPP EXPANDS US OPERATIONS WITH NEW ATLANTA WAREHOUSE FACILITY

LAPP, a leading global provider of industrial power, control, data and signal cables, connectors, cable glands, and industrial communication systems is expanding its North American footprint -moving its Atlanta operations to a larger facility in Lawrenceville, Georgia. The successful move was completed on March 30, and the new facility is now fully operational, stocking inventory, processing and fulfilling customer orders. With the expanded Atlanta-area facility, LAPP enhances its logistics and warehousing capacities supporting its North American headquarters in Florham Park, New Jersey.

The new space close to doubles LAPP's Atlanta-based warehousing, production and logistics presence from 25,000 to 59,100 square feet, including cutting machines, product stocks, a state of the art training facility and sales offices. The additional capacity will enable LAPP to prepare, process, and deliver products faster to customers regionally, as well as the entire US & Canada.

"This successful move, despite the challenges and restraints caused by the COVID-19 outbreak was impressive. This new facility allows us to provide improved customer service - making it possible for our logistics processes to better react to restrictions in trade and transportation, and to make rapid adjustments during the pandemic. When confronted by COVID-19-related challenges, our staff met them with flying colors," said Stella Kaplansky, Director of Logistics for North America. "We look forward to building on this success with even greater service to our customers with the help of our newly expanded Atlanta-area facility."

The new warehouse is located at 2406 Tech Center Parkway, Building F, Suite 400, Lawrenceville, GA 30043.

LAPP manufactures the highest quality cable, connectors, glands and industrial communication solutions to enhance factory automation and future-ready industrial manufacturing production systems and equipment.
